

IPVS UNIVERSITY

Hosted and Sponsored by:  **ipConfigure** &

Perimeter Technology | Tulsa, Oklahoma | March 10-11, 2010

What is IPVS University?

ipConfigure has partnered with industry manufacturers and experts to deliver a robust curriculum that requires minimal IT experience while providing physical security and IT professionals with the working knowledge to design, implement, and manage IP based video surveillance systems.

The two-day certification is limited to fifteen participants and offers a unique 40/40/20 mix of presentations, labs, and guest lecturers covering topics from networking to video analytics. There is no other IP video surveillance certification offered that covers such a broad spectrum of topics while maintaining a manufacturer independent perspective.

Topics Include:

- Switches, Servers, Storage, & Cameras
- Compression, Resolution & Analytics
- Architecture, Bandwidth, & Storage
- ipConfigure history and products
- Demonstrations and Training Labs

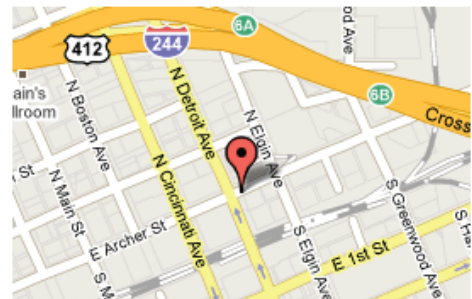

Things to bring:

Participants are required to bring their own laptops to the class with the minimum requirements of the following:

- Intel PIV, 500 MB RAM, Windows XP, IE 7 (or better)
- CD ROM Drive
- CAT5 network cable socket
- Microsoft XP Pro (32-bit), Vista Business (32-bit) or Vista Ultimate (32-bit). All updates (available on the Microsoft website) should be installed prior to training. If using Vista, User Access Control (UAC) must be disabled.
- Microsoft .Net Framework v. 2.0 or better
